

ORION.2

ELECTROPNEUMATIC CONVERTER

- ✓ Open-loop transducer
- ✓ Control of both closed-loop and open-loop web tension regulation systems
- ✓ Used with pneumatic brake or clutch
- ✓ Compact design
- ✓ Good price to quality ratio

Orion.2 is an electropneumatic converter, which help you to obtain highest tension precision of the web; recommended for the excellent price/performance ratio, it can be used both on open-loop and closed-loop systems.

Thanks to its compact dimension it can be easily installed near the brake or the clutch it is connected to, in order to obtain the maximum performance.

Orion.2 proportionally transforms an input electric signal into a pneumatic signal.

TECHNICAL DRAWING

TECHNICAL DATA

Power supply	24 Vdc
Input signal	0÷10V
Electrical connection	M12 5 poles
Working temperature	0÷50°C
IP protection class	Ip65

Pneumatic connections

Supply over max output pressure	1 bar (22 psi) min
Output pressure	0÷6 bar (0÷90 psi) max - different outputs on request
Fluid	filtered to 5 microns, dried, and dehumidified
Connections	G 1/4"

*Data are subject to technical change without notice
